BATCH

**RETA60-0524**

STATUS

**PASSED**

|                    |                                                             |
|--------------------|-------------------------------------------------------------|
| PRODUCT            | Retatrutide 60mg                                            |
| BATCH NUMBER       | RETA60-0524                                                 |
| DATE TESTED        | May 20, 2024                                                |
| TESTING LABORATORY | Janoshik Analytical                                         |
| METHOD             | RP-HPLC / UV 214nm, confirmed by LC-MS                      |
| APPEARANCE         | White lyophilised powder                                    |
| SOLUBILITY         | Clear, colourless solution on reconstitution                |
| PURITY RESULT      | 99.3%                                                       |
| SPECIFICATION      | Not less than 99.0%                                         |
| STORAGE            | Lyophilised: -20C. Reconstituted: 2-8C, use within 30 days. |

RESULT Identity confirmed. Purity 99.3% meets the release specification.
